

Jamie McKenzie is the Engineering Manager for the Mississippi Division of Atmos Energy. In his current role, he is responsible for all engineering designs, system planning, and capital budgets for Atmos' pipeline network within Mississippi. During his career in the natural gas industry, Jamie has work for United Gas Pipe Line Company, Mississippi Valley Gas Company, and Atmos Energy. He has a cumulative total of thirty-five years of experience in the areas of transmission and distribution engineering, pipeline operations, gas supply, and compliance. Jamie is a registered professional engineer in Mississippi and Texas. He has served on technical committees associated with the Southern Gas Association and the American Gas Association. Jamie graduated from Auburn University in 1982 with a Bachelor of Civil Engineering, and Houston Baptist University in 1993 with a Master of Business Administration.

Jamie and his wife, Frieda, reside in Brandon.
