

BLUEPRINT MISSISSIPPI

Health Care

An Economic Driver

In looking to Mississippi's future, it's important we continue to further expand opportunities defined in the Blueprint Mississippi report designed to transform our state.

The Blueprint Mississippi Health Care: An Economic Driver study is a perfect example of the proactive approach leaders around Mississippi are committed to taking. This first of its kind statewide study involved countless leaders from all regions of Mississippi who have taken part in task forces, conference and Web calls, surveys and meetings. Their input helped make this study a reality, and their continued support will ensure implementation of the recommendations.

The Mississippi Economic Council's M.B. Swayze Foundation continues to advance the research of Blueprint Mississippi – and this study is an example of our continuing commitment to helping put Mississippi in the place of greatest opportunity. We are grateful for the significant support of the Mississippi Partnership for Economic Development for a grant to fund the study in its entirety and to our announcement sponsors who enabled the promotion of this important work.

This significant research marks another step toward fulfilling the Blueprint vision of a more prosperous, vibrant and resilient Mississippi, built upon a foundation of economic opportunity for all its citizens.
